

# Make your own multiples of 10 counting stick

## Making your own counting stick:

1. First, cut along the dashed lines of the counting stick template.
2. Next, fold the template along each of the black lines to make a cuboid shape.
3. Finally, put glue on the 'tab' and stick to the opposite, long side of the template and hey presto!

## Preparing your own picture cards and number line:

1. Carefully, cut along the dashed lines around each picture card and the number line.
